

Call for Applications: India Alliance Research Grants

Team Science Grants 2021

DBT/Wellcome Trust India Alliance invites applications for its **Team Science Grants (TSG)** scheme, which will fund teams that bring together high-quality scientists from multiple institutions with complementary skills, knowledge, and resources to address an important health challenge for India. High-risk, high-reward proposals can also seek funding under this programme.

It is envisioned that the funded projects will be multi-institutional and have an inter-disciplinary approach and a suitable research management plan and structure. Though not mandatory, international collaborations are encouraged.

A grant of up to INR 10 crores (including 10% overheads) is available for a 5-year project under this scheme.

Details on eligibility, provisions, funding, application process, and other guidelines of this grant can be found on [our website \(www.indiaalliance.org/team-science-grants\)](http://www.indiaalliance.org/team-science-grants), and all queries may be addressed to: team.science@indiaalliance.org.

The applications can be submitted through our online portal [HERE](#). The application submission deadline is **6 July 2021 (2:00 PM IST)**.

Clinical/Public Health Research Centres Grants 2021

DBT/Wellcome Trust India Alliance invites applications to fund **Clinical/Public Health Research Centres (CRCs)**, which are envisioned as 'research-oriented centres', preferably involving multiple institutions that focus on important biomedical research problems and develop physician scientists. This scheme aims to improve clinical and public health research ecosystems in India to bridge gaps in human resource, supervision, mentorship, equipment, and administration.

The CRCs would be virtual centres that could be based on either crosscutting or vertical research themes, with the training of early career physician researchers as an essential component. Though not mandatory, this scheme encourages international collaboration.

CRCs may also link up with the [Clinical Research Training Programme \(CRTP\)](#) to develop a 3 to 4-year mentored training programme for clinical and public health researchers.

A grant of up to INR 10 crores (including 10% overheads) is available for a 5-year project.

Details on eligibility, provisions, funding, application process, and other guidelines of this grant can be found on [our website \(https://www.indiaalliance.org/clinical-public-health-research-centres\)](https://www.indiaalliance.org/clinical-public-health-research-centres), and all queries may be addressed to clinical.research@indiaalliance.org.

The applications can be submitted through our online portal [HERE](#). The application submission deadline is **6 July 2021 (2:00 PM IST)**.
